An easy-to-read, comprehensive overview of the available evidence in current glaucoma practice.

Representative cases with diagrams and pictures, flowcharts and algorithms for patient management, form the core structure of the manual.

Aims to enable the student and practitioner in approaching each patient in a logical and scientific manner.

It will also aid in preparing for clinical case discussions at exams.

This book is a practical guide to the use of perimetry in the diagnosis of eye diseases and disorders.

Includes clinical case studies.

Provides commentary on recent advances, care and maintenance of perimeters and history of the technique.

Enhanced by clinical photographs and illustrations.

It is a practical primer on perimetry for general ophthalmologists, glaucoma surgeons, neuro-ophthalmologists, and trainees as well.

Key Features

- Highlights clinical utility of new anterior segment investigations in ophthalmology.
- Includes indications, optical principles, interpretation of printouts and case studies.
- Evaluates cornea and ocular surface with specular and confocal microscopy, corneal topography and biomechanics.
- Ultrasound biomicroscopy and anterior segment OCT.
- Orbital imaging techniques with CT scan and MRI.

Key Features

- An easy-to-read, comprehensive overview of the available evidence in current glaucoma practice.
- Representative cases with diagrams and pictures, flowcharts and algorithms for patient management, form the core structure of the manual.
- Aims to enable the student and practitioner in approaching each patient in a logical and scientific manner.
- It will also aid in preparing for clinical case discussions at exams.

Key Features

- A comprehensive textbook cum atlas.
- Rich visual format with illustrations and images.
- Abundant use of bullet-point lists and boxes.
- Each section has been colour-coded for easy cross-referencing.
- Step-by-step explanation of operative techniques and surgical strategies.
- A special section on ethics and medicolegal aspects of surgical practice is a unique feature of the book.

Key Features

- This book is a practical guide to the use of perimetry in the diagnosis of eye diseases and disorders.
- Includes clinical case studies.
- Provides commentary on recent advances, care and maintenance of perimeters and history of the technique.
- Enhanced by clinical photographs and illustrations.
- It is a practical primer on perimetry for general ophthalmologists, glaucoma surgeons, neuro-ophthalmologists, and trainees as well.
Ophthalmology & Optometry

**Retina & Vitreous Surgery**
*A Practical Guide to Theory, Practice and Management*
Subhendu Kumar Boral

- Covers all the intricate points in retina-vitreous.
- Plenty of animations, illustrations and well-explained surgical intraoperative photographs.
- Surgical videos in high-definition.
- Explains, “How to setup a vitreoretinal surgery theatre and recording system?”
- Ten-DVD videos are a unique, fascinating and masterful addition to the literature on retina surgery.

**Key Features**
- Full Colour | Hardbound | 1/e, 2016
- 8.5” x 11” | 240 pp | 9789385999703
- ₹ 8995

**Clinical Guide to Angio-OCT**
*Non Invasive, Dyeless OCT Angiography*
Bruno Lumbroso, et al.

- Shows every day OCT user the clinical utility of OCT Angiography.
- Presents SSADA algorithms and its applications, choroidal neovascularization (CNV), optic disk disorders and glaucoma.
- New terminology to study new technique.
- Includes description of the vascular anatomy of retina and choroid, syndromes and clinical signs.
- Presents technological or scientific Angio-OCT progresses and their clinical applications.

**Key Features**
- Full Colour | Soft Cover | 3/e, 2014
- 8.5” x 11” | 576 pp | 9789351520917
- ₹ 2995

**Gonioscopy**
*A Text and Atlas*
Tanuj Dada & Talvir Sidhu

- A comprehensive text and atlas on Gonioscopy including:
  - Over 600 gonioscopic photographs
  - Principle, indications, techniques, classification and types of gonioscopes
  - Dynamic gonioscopy, Intraoperative gonioscopy, RetCam gonioscopy
  - Normal gonioanatomy and developmental anomalies
  - Angle closure and open angle forms of glaucoma
  - Tumors, foreign bodies, surgical complications and systemic diseases
  - Self-assessment questionnaire

**Key Features**
- Full Colour | Hardbound | 2/e, 2018
- 8.5” x 11” | 228 pp | 9789352705150
- ₹ 2495
Ocular Infections
Prophylaxis and Management
Namrata Sharma, et al.

New

OCULAR INFECTIONS
Prophylaxis and Management

Key Features
- An explicit and easy-to-read book.
- Provides comprehensive information on operation theatre design, layout and requirements for setting up an operation theatre.
- Highlights the methods of sterilization and disinfection of operation theatre and instruments with special reference to ophthalmic operation theatre.
- Enlists the prophylactic measures to be taken pre-intra-and post-operatively for the prevention of post-surgical infections of the eye.

Full Colour | Soft Cover | 1/e, 2017
8.5” x 11” | 184 pp | 9788131222883
¥ 2500

AIOS Ready Reckoner in Ophthalmology
D Ramamurthy & Partha Biswas

New

Key Features
- The second edition of the ready reckoner brings forth a comprehensive overview of common ocular diseases.
- Updated with the latest advances along with new chapters.
- A new section on Pediatric Ophthalmology has been incorporated.
- Ready reference for residents in training, practising ophthalmologists as well as optometrists and optometrists to serve their patients effectively and efficiently.

Full Colour | Hardbound | 2/e, 2017
6.5” x 9.75” | 760 pp | 9789386261434
¥ 895

Textbook of Pterygium Management
Tushar Agarwal, et al.

New

Key Features
- Comprehensive guide to the diagnosis and management of pterygium.
- Highly illustrated with clinical photographs and is accompanied by an interactive DVD ROM.
- Involves the chapters on surgical management of primary and recurrent pterygia with 12 case-based videos on the surgical techniques by leading experts.
- Useful for budding ophthalmologists and the cornea surgeons alike to replicate the surgical steps of their respective patients.

Full Colour | Hardbound | 1/e, 2017
8.5” x 11” | 166 pp | 9789386261540
¥ 1695

Practical Handbook of Fluorescein Angiography
Bruno Lumbroso & Marco Rispoli

Key Features
- Widely illustrated with Fluorescein Angiography figures with ICG, Autofluorescence, sagittal and frontal OCT images.
- Shows how to read and interpret Fluorescein Angiography imaging, documenting and diagnosing the most common retinal pathologies.
- Difficult & rare diagnoses and disorders are explained in tabular form.
- Useful handbook not only for young doctors and residents, but also for ophthalmologists.

Full Colour | Soft Cover | 1/e, 2014
8.5” x 11” | 146 pp | 9789350909911
¥ 1495

Moorfields Manual of Ophthalmology
Timothy L. Jackson

Key Features
- Thoroughly revised and updated text reflecting the latest diagnostic techniques and treatment options in eye disease.
- Enriched with high quality colour photographs, numerous new and replaced images for the better diagnosis of both common and rare eye conditions.
- In depth sections on clinical examination skills essential for clinical practice and professional examinations.
- Updated guidance notes for general practitioners and optometrists, to assist in prioritising referrals.

Full Colour | Plastic (Binding-Welded) | 2/e, 2014
4” x 7.25” | 768 pp | 9781907816888
¥ 1795
Recent Advances in Ophthalmology
Vol. 13
HV Nema & Nitin Nema

Key Features
- Contains 20 editorials and 19 chapters on selected topics in ophthalmology.
- Focuses mainly on endophthalmitis, its differential diagnosis and control.
- Includes an interesting subject of intravascular intervention in neuroophthalmic disorders.
- Opens new avenues for the treatment and progression of glaucoma through imaging.
- Enriched with multiple imaging photographs, diagrams and flowcharts.

Ophthalmic Diagnosis & Treatment
Myron Yanoff, et al.

Key Features
- Entities are presented in alphabetical order for easy for eye care providers and students.
- Each chapter contains tabular summaries on two pages, with diagnostic details on the left and treatment details on the right.
- Each condition features a definition, synonyms, common signs and symptoms, differential diagnosis, complications, treatment, and follow-up and management, as well as ICD-9 codes and images.

Dr Agarwal's Textbook on Corneal Topography
Including Pentacam and Anterior Segment OCT
Amar Agarwal

Key Features
- A comprehensive guide to the latest technological developments in corneal topography.
- Divided into six sections, the first is an introduction to corneal topography and orbscan.
- The final section includes an OCT assessment of glued IOL position.
- Highly illustrated guide to the latest developments in the field of corneal topography.
- Includes nearly 400 full colour images.

Copeland and Afshari's Principles and Practice of Cornea
Robert A Copeland Jr. & Natalie A Afshari

Key Features
- In volume one, the common cornea topics of structure, physiology, tumors, etc. are discussed.
- The second volume is dedicated to corneal surgery.
- Each segment is complete, relevant and expertly written.
- White papers conveying in a stepwise manner how to perform a particular surgery.
- An effective learning tool and a utilitarian resource for practicing surgeons.

Ultrasound of the Eye and Orbit
Sandra Frazier Byrne & Ronald L Green

Key Features
- Updates the body of knowledge in ophthalmic ultrasound.
- To describe new instrumentation and examination techniques.
- Three new chapters have been written by guest contributors which describe the most important technologic advances in ophthalmic ultrasound in the last ten years. The three chapters are ultrasound biomicroscopy (Chapter 8), three-dimensional ultrasound (Chapter 9), and color Doppler imaging (Chapter 14).
Ocular Treatment Evidence Based
Frederick Hampton Roy

Practical Handbook of OCT
(Retina, Choroid, Glaucoma)
Bruno Lumbroso & Marco Rispoli

Uveitis
Text and Imaging
Amod Gupta, et al.

Diagnosis & Treatment of Uveitis
C Stephen Foster & Albert T Vitale

Postgraduate Ophthalmology
Zia Chaudhuri & M Vanathi

Atlas Optical Coherence Tomography of Macular Diseases and Glaucoma
Vishali Gupta, et al.
Sankara Nethralaya’s
Atlas of Imaging in Ophthalmology
Ambika Selvakumar, et al.

Full Colour | Hardbound | 1/e, 2014
8.5” x 11” | 762 pp | 9788184489002 | ₹ 7995

Key Features
- This book aims to cover important aspects of Computed Tomography (CT) and Magnetic Resonance Imaging (MRI) in the diagnosis of various ophthalmic diseases.
- Extensive collection of CT and MRI images.
- Covers recent advances in imaging in the techniques and hardware of magnetic resonance imaging (MRI).
- Diseases are explained step-by-step by its Diagnostic Techniques, Clinical Features, Radiological Features, Differential Diagnosis, MRI Imaging and Neuroimaging, etc.

Sankara Nethralaya
Clinical Practice Patterns in Ophthalmology
SS Badrinath & Prema Padmanabhan

Full Colour | Hardbound | 2/e, 2013
8.5” x 11” | 90 pp | 9789350095357 | ₹ 695

Key Features
- Designed to fulfil the need of practicing ophthalmologists who may not have the time or access to books and journals.
- New chapters added are Ocular Surface Disease, Neuroretinitis, Toxic Amblyopia, and New Classification of Corneal Dystrophies (IC3D).
- Covers new treatments like Management of Retinoblastoma, Anti-VEGF Intravitreal Injections-Indications, Dosage, Preparation, etc.

The Sankara Nethralaya
Atlas of Ophthalmic Ultrasound and Ultrasound Biomicroscopy
Muna Bhende, et al.

Full Colour | Hardbound | 2/e, 2013
8.5” x 11” | 602 pp | 9789350905357 | ₹ 3295

Key Features
- Many new images have been updated in the chapters on imaging of the posterior segment and orbit.
- A new section on ultrasound bio-microscopy has been included.
- Covers common and rare conditions with the inclusion of anterior segment.
- Aims to educate novices and at the same time refresh the knowledge of the qualified ophthalmologists.

The Sankara Nethralaya
Atlas of Fundus Fluorescein Angiography
Pukhraj Rishi, et al.

Full Colour | Hardbound | 2/e, 2013
8.5” x 11” | 624 pp | 9789350255773 | ₹ 4995

Key Features
- Comprehensive reference guide on the fluorescein angiographic findings of different disorders.
- More than 1400 coloured images with about 400 new images in this present edition.
- A “Self-test” chapter has been included in the end for quick revision.

The Sankara Nethralaya
Atlas of Retinal Diseases
Padmaja Kumari Rani, et al.

Full Colour | Hardbound | 1/e, 2008
8.5” x 11” | 602 pp | 9788184482560 | ₹ 5500

The Sankara Nethralaya
Atlas of Neuro-Ophthalmology
Satya kama, et al.

Full Colour | Hardbound | 2/e, 2007
8.5” x 11” | 410 pp | 9788184481198 | ₹ 4500

The Sankara Nethralaya
Atlas of Uveitis and Scleritis
Sudha K Ganesh, et al.

Full Colour | Hardbound | 1/e, 2005
8.5” x 11” | 216 pp | 9788180614668 | ₹ 3995
Textbook of Contact Lenses
Rajesh Sinha & Vijay Kumar Dada

Key Features
- The book provides a nice coverage of the basic understanding of contact lens fitting as well as the latest updates in the field of contact lens practice.
- Discusses the handling special situations with contact lens in specific chapters.
- Aims at providing information to the contact lens practitioners in their day-to-day practice.
- It is also meant for the postgraduate students who are pursuing their career in Ophthalmology.

Ophthalmic Surgical Instruments
Rajesh Sinha, et al.

Key Features
- This book is a guide to instruments used in ophthalmic surgery for trainees.
- A comprehensive description and colour photographs are provided for each instrument.
- Includes chapters on needles and sutures, and sterilisation of surgical instruments.
- Contains good quality original photographs for optimal understanding of the readers.
- Magnified views of instruments are presented through photographs.

FRCS Ophthalmology Cakewalk
Mamta Mittal

Key Features
- A concise, readable and easy-to-use book.
- Designed to fulfil the needs of a busy resident or clinician in quick preparation for exams.
- Reviews a wide spectrum of topics under Ophthalmology.
- The information and key facts covered are relevant from examination perspective.
- Main topics are highlighted at the beginning of all the chapters.

Manual of Glaucoma
Shibal Bhartiya & Parul Ichhpujani

Key Features
- A comprehensive reference guide to the basics, diagnosis and new surgical possibilities for the treatment of glaucoma.
- Includes a separate chapter on complementary and alternative therapies, as well as new surgical modalities, wound healing techniques and postoperative care.
- Enhanced by 236 full colour images and illustrations.
- An essential source of reference for ophthalmologists and ophthalmology residents.

Five Steps to Start Your Refractive Surgery
A Case-Based Systematic Approach
Mazen M Sinjab

Key Features
- Designed to cover basic principles, surgical concepts and techniques.
- Provides detailed discussions and expert guidance on topography, tomography, wavefront technology, anterior OCT imaging, major refractive options, expert clinical rules and recommendations.
- Builds simple but strong correlation between basics and clinical interpretation.
- An essential reference resource for Refractive Surgeons.

Gonioscopy
A Video Assisted Skill Transfer Approach
Tanuj Dada, et al. including Intraoperative Procedures and Self-assessment Video Quiz

Key Features
- A unique video assisted skill transfer module comprising of 137 diagnostic and surgical gonioscopy videos.
- Intraoperative gonioscopy in eyes with congenital glaucoma, cyclodialysis and minimally invasive glaucoma surgery is also included.
- Techniques of dynamic gonioscopy using indentation and manipulation have also been incorporated.
- A self-assessment video quiz has also been incorporated into this training module.
Ophthalmology & Optometry

CATALOGUE 2017-18

Femtosecond Laser Assisted Keratoplasty
Jorge Alio

Key Features
- The first one on the topic of femtosecond-assisted corneal transplantation techniques.
- The different chapters of this book devoted entirely to corneal grafting surgery assisted by femtosecond lasers.
- This book aims to instruct the corneal surgeon in the ways in which femtosecond lasers can be used for corneal grafting surgery.

Corneal Topography in Clinical Practice (Pentacam System)
Basics & Clinical Interpretation
Mazen M Sinjab

Key Features
- The second edition of the book concentrates on the topography and tomography of the very advanced machine “The Pentacam HR”. It is a pioneer book in this field.
- New chapter on Corneal Topography in Cataract Surgery is added in this edition with modifications in some chapters.
- Excellent pictorial quality with more than 220 coloured images and illustrations along with a concise but ordered text.

Wills Eye Strabismus Atlas
Leonard B Nelson & Robert A Catalano

Key Features
- All-in-one atlas depicting ocular anatomy, sensory physiology, tests of sensory status and ocular alignment.
- Anatomical and physiologic illustrations describe normal anatomic and physiologic relations as well as abnormalities in binocular function and ocular alignment.
- Enriched with more than 350 photographs and diagrams.

Cataract Surgery in Diseased Eyes
Arup Chakrabarti

Key Features
- This book deals with practical aspects of cataract surgery in eyes with coexisting ocular morbidities.
- Valuable to the novice as well as the experienced phaco surgeon.
- Each chapter has been expertly presented by a surgeon of global repute.
- This book will serve as a ready-reckoner for the surgical management of these challenging cataracts in compromised eyes.

Intravitreal Injections
Shalabh Sinha & Lalit Verma

Key Features
- This multi-author book attempt to address intravascular agents, the technique of injections, complications and recommendations.
- Discusses guidelines of current agents for their better clinical practice.
- Newer agents provide understanding of future practices.
- A chapter on what lies in-stores for us as medical retinologists for treating our patients is also included.
- Enriched with full color illustrations for better understanding of Intravitreal Injections.

</table>

**Key Features**

- Major rewrite of all chapters, incorporating many new treatments that are increasingly accessible in poorer countries, particularly for retinal disease, trachoma and HIV.
- Thorough update on current epidemiology of worldwide visual impairment and blindness.
- Major overhaul of photographs and illustrations: almost all replaced with new, high quality images.
- Full colour | Soft Cover | 5/e, 2015
- 6.25" × 9.25" | 400 pp
- ISBN: 9781909836228

- This second edition is a highly illustrated guide to the complex pathophysiology of this field, including simple illustrations which explain the pathway of the nerves involved.
- Includes a new chapter on "Optic Nerve Sheath Fenestration".
- With 150 full colour images and illustrations.
- Updated guide to a complicated field of medicine, ideal for both students and practising ophthalmologists.
- Full Colour | Soft Cover | 1/e, 2017
- 6.75" × 9.5" | 402 pp
- ISBN: 9789386261236

- Text is illustrated with plenty of diagrams, comprising of clinical photographs and clear line diagrams.
- Operative steps of important surgical techniques have been given in the relevant chapters.
- Review of Ophthalmology, a companion to the textbook, offers quick comprehension at a glance and an opportunity for self-assessment with latest multiple choice questions (MCQs).
- Full Colour | Soft Cover | 6/e, 2015
- 7.25" × 10.25" | 634 pp
- ISBN: 9789351526875

- The book presents comprehensive review of the visual impairment associated to the age-related debilitation.
- Principles of spectacles correction in presbyopes are detailed.
- Explains the different contact lenses adaptation techniques.
- Numerous illustrations bring explanations in a few technical domains.
- The index directs the reader conveniently in the text by means of keywords or contextual ideas.
- Full Colour | Hardbound | 1/e, 2015
- 7" × 7" | 220 pp
- ISBN: 9789351524984

- This manual has been prepared for MBBS final year students for the theory, clinical and viva examinations.
- Recent concepts have been included in all chapters.
- Numerous differential diagnoses are given in the form of tables for easy grasp of important points.
- Miscellaneous chapter includes all lift over topics along with answers given for viva.
- Single Colour | Soft Cover | 1/e, 2016
- 6.75" × 9.5" | 436 pp
- ISBN: 9789352500038
All the major and latest clinical trials have been recorded, covering all ophthalmic subspecialties.

A summary at the end of each chapter.

All the trials have been listed alphabetically and indexed at the end.

Ready reckoner before examinations, viva, and interviews for all ophthalmology residents, fellows, teachers, and clinicians.

Handbook of Clinical Trials in Ophthalmology
Ak Gupta, et al.

Key Features
- This book attempts to update the state-of-the-art vitreoretinal surgery in a lucid, authoritative and well-illustrated manner.
- The value of this book lies in the quality and expertise of the text chapters' contributors from across the globe.
- The book is intended for the experienced ophthalmologists, postgraduates as well as those in training. This pragmatic book provides an understanding of vitreoretinal surgery important to the everyday practice.

Minimally Invasive Vitreous Surgery
Shalabh Sinha

Key Features
- A multiauthor book.
- The book is enriched with illustrations.
- Incorporates relevant references at the end of the chapters.
- Serves as a useful resource in the hands of retinovitreous surgeons.

Essentials of Ophthalmology
Samar K Basak

Key Features
- Ideal book for medical students, residents and health professionals for core information in ophthalmology.
- New edition based on international standard meeting US guidelines like the use of American Spelling.
- Bulleted and easy-to-read format.
- More than 700 high-quality and accurate photographs and 250 line diagrams for a clear representation of detailed ophthalmic structures.
- Includes an interactive DVD-ROM including important ophthalmic surgery videos.

Principles and Practice of Vitreoretinal Surgery
Narendran V & Abhishek R Kothari

Key Features
- This book has selected sections which deals with every aspect of vitreoretinal surgery ranging from principles of VR surgery, basic to advanced techniques, evolution of instrumentation, expanding indications for VR surgery, role and advantages of VR surgery in trauma, and also includes a section on the recent development.
- Includes chapter on systematic vitreoretinal surgery training and teaching through surgical simulators.
Ocular Differential Diagnosis
Frederick Hampton Roy

Key Features
- Helps in quickly making a diagnosis based on presentation and symptoms.
- Presents straightforward, comprehensive lists of causes for each symptom or finding, as well as drugs associated with each disorder.
- Useful for students and teachers of Ophthalmology, research fellows, optometrists, ophthalmologists, and eye care practitioners.

Dispensing Optics
Ajay Kumar Bhootra

Key Features
- Practical, logical and a fascinating book.
- Explains the art and science of optical dispensing.
- Enriched with latest ideas and concepts in practice.
- To the point content, theories and practical guidelines make the book reader-friendly.
- Includes modern digital dispensing system and lens customization.
- Each chapter contains vivid real-world practical tips.

Practical Retinal OCT
Bruno Lumbroso & Marco Rispoli

Key Features
- This manual is a step by step guide to optical coherence tomography (OCT) imaging and its interpretation.
- Qualitative and quantitative analysis of pathologic OCTs.
- Separate chapters are dedicated to “en face” imaging and the role of OCT in the study and treatment of glaucoma.
- This practical reference is highly illustrated with clinical images, illustrations and tables throughout.

Essentials of Ophthalmology
Dadapeer K

Key Features
- Comprehensive review for undergraduates and quick review for postgraduates.
- Provides a straightforward and easy-to-use guide for the students of Ophthalmology course to grasp key information quickly and prepare for examinations effectively.
- Important Notes, Interesting Facts, Gist Boxes and Frequently Asked Questions are described in each section.

Clinical OCT Angiography Atlas
Bruno Lumbroso, et al.

Key Features
- Guide to the understanding and interpretation of Angio-OCT.
- Provides complete overview of technique and interpretation, including terminology.
- Describes use of OCT for diagnosis of ocular diseases and disorders.
- Highly illustrated with more than 250 clinical images.
- Internationally recognised editor and author team.
- Useful for pathologists to understand the wide range of vascular pathologies.

Self Assessment and Review of Ophthalmology
Sudha Seetharam

Key Features
- Concise text with all recent questions.
- Includes Golden Points for NEET at the end of each chapter.
- Image-based questions on clinical cases.
- Concepts are based on latest editions of standard textbooks, like Kanski, Yanoff-Duker, Parson, and Khurana.
- Answers with precise explanations of all recent questions of 2016.
- Important points to remember have been highlighted with superscript Q.

Ophthalmology & Optometry

Catalogue 2017-18

Step by Step Phacoemulsification
Amar Agarwal & Priya Narang

Key Features
- A pragmatic guide to better understanding of the basics and advanced concepts of phacoemulsification.
- Provides comprehensive and current information.
- Enriched with wide ranges of clinical photographs.
- Provides an interactive DVD-ROM that describes some of the newer surgical techniques to handle complications.
- New chapters on handling complications in phacoemulsification surgery.

Full Colour | Soft Cover | 3/e, 2015
4.75” x 7” | 295 pp | ₹ 875

Diagnosis & Management of Glaucoma
R Ramakrishnan, et al.

Key Features
- A well-illustrated book covering basics, diagnostic, medical and surgical management of glaucoma with an evidence-based approach.
- Covers both conventional methods and the latest innovative medical and surgical therapies for treating glaucoma.
- Provides the residents, postgraduates, fellows and general ophthalmologists with a global perspective on glaucoma.

Full Colour | Soft Cover | 1/e, 2013
8.25” x 10.75” | 680 pp | ₹ 2750

Phacoemulsification
Amar Agarwal, et al.

Key Features
- The star-studded editors and their team of international, world-renowned experts have provided the latest advances in the field in an easy-to-understand format.
- The entire gamut of cataract surgery from the basics such as IOL power calculation, phaco machine, etc. to the very recent advances such as femtosecond laser-assisted cataract surgery and others have been covered in detail.
- Beginners in the field, advanced surgeons and researchers will all find this book to be an asset to their surgical practices.

Full Colour | Hardbound | 4/e, 2012
8.5” x 11” | 610 pp | ₹ 5995

Ocular Pharmacotherapy
Jose Manuel Benitez-del-Castillo, et al.

Key Features
- This book, from the Chairman of Ophthalmology at Complutense University in Madrid, is an essential resource for residents, students and practising ophthalmologists.
- It provides key information regarding both the basic pharmacology of ophthalmic drugs and their use in clinical practice.
- Over 140 full colour images, including numerous high-quality clinical photographs, charts and tables, enhance understanding.
- Assists in making initial decisions on treatment.

Full Colour | Soft Cover | 1/e, 2017
6.25” x 9.5” | 438 pp | ₹ 1295

Keratoconus When, why and Why Not
A Step by Step Systematic Approach
Mazen M Sinjab

Key Features
- This book is unique in its way in presenting the facts and concluding the simplest ways for approaching the patients, depending on flow charts, high-quality illustrations and characterizing tables.
- This book consists of 4 chapters; chapter 1 is about classification, chapter 2 about managements, chapter 3 on study cases, and chapter 4 is a self-assessment entertainment chapter.

Full Colour | Soft Cover | 1/e, 2012
7.25” x 9.5” | 156 pp | ₹ 995

Jaypee Gold Standard Mini Atlas Series
Phacoemulsification
Amar Agarwal & Priya Narang

Key Features
- The book has been written to provide a framework for learning skills of phacoemulsification surgery.
- Displays images of the surgery in varied situations.
- Includes a DVD with videos showcasing the surgical aspects of handling numerous clinical conditions related to phacoemulsification and its complications.
- Highlights current concepts in surgical practice.

Full Colour | Soft Cover | 2/e, 2015
4.75” x 6” | 192 pp | ₹ 795
Step-by-Step Reading Pentacam Topography (Basics and Case Study Series)
Mazen M Sinjab

Key Features
- Step-by-step approach and easy to memorize.
- The aim of this book is to correlate the basics of Corneal Topography and Tomography to clinical practice by following systematic clinical interpretation.
- Includes case studies for reading and interpreting corneal tomography.
- Many new chapters have been added and the existing chapters are modified.
- Includes multiple topography images with excellent pictorial quality.

Diabetic Retinopathy
Bruno Lumbrroso, et al.

Key Features
- A concise manual covering the basic science and epidemiology of diabetic retinopathy.
- Examines different diagnostic techniques including fluorescein angiography, OCT, and 'en face' OCT.
- Concludes with review of therapeutic options.
- Authored by recognised clinicians led by Prof Bruno Lumbrroso.
- Highly illustrated with specially commissioned artworks and classic images of each condition and its progression.

Text and Atlas on Corneal Pigmentation
Jorge L Alió, et al.

Key Features
- This clinical atlas shows the evolution of this technique over the years with adequate outcomes.
- Experimental atlas describes methods of investigations; evolution of the technique.
- Clinical atlas of keratopigmentation cases offers the real facts and possibilities of corneal pigmentation.
- Clinical cases are given for therapeutic purposes.
- Appendices demonstrate the presentations about keratopigmentation in different congresses and conferences since 2008.

Elevation Based Corneal Tomography
Michael W Belin, et al.

Key Features
- A concise guide to elevation based tomographic imaging for ophthalmologists and cataract surgeons.
- Contributions from internationally renowned authors.
- Various procedures for different conditions are discussed including the use of Pentacam for cataract disorders.
- Includes more than 200 colour images and illustrations.
- Includes a section on glossary of important terminology.

Aravind FAQs in Ophthalmology
N Venkatesh Prajna

Key Features
- This book aims to serves as a compilation of the frequently asked questions (FAQs) and the answers expected in a postgraduate clinical ophthalmology examination.
- These questions have been painstakingly gathered over a 10-year period.
- This book also contains examples of case sheet writing and different management scenarios, which will help the students to logically analyze and answer in a coherent manner.

Femtosecond Laser Techniques & Technology
Ashok Garg & Jorge L Alió

Key Features
- Focuses on the current technology and future aspects.
- Serves as a complete resource of Femtosecond Laser for the academic and management in the new healthcare era in ophthalmology.
- The main aim of the book is to present a panoramic view of Femtosecond Laser, procedures and future technology for the different diseases of ophthalmology with more than 200 coloured illustrations and images.

**Clinical En Face OCT Atlas**

- Full Colour | Hardbound | 1/e, 2013
- 8.5" x 11" | 498 pp | 9789350902967
- **$6500**

**Key Features**

- Shows everyday OCT uses the utility of clinical en face imaging.
- Have outstanding contributions from leaders in the field.
- This atlas should guide the general ophthalmologists to select the best en face views and read easily the typical and atypical aspects of en face images.

---

**Wavefront A Text and Atlas**

- Full Colour | Soft Cover | 1/e, 2014
- 8.5" x 11" | 140 pp | 9789351522478
- **$1595**

**Key Features**

- Covers basic concepts of Wavefront.
- Presents the analysis of aberration features.
- Includes the applications of aberration in clinical practice.
- Describes the clinical examples and cases retrieved from present and updated literature.
- An essential atlas for ophthalmologists and optometrists.

---

**Descemet’s Stripping Automated Endothelial Keratoplasty Different Strokes**

- Full Colour | Hardbound | 1/e, 2013
- 8.5" x 11" | 200 pp | 9789350903285
- **$3500**

**Key Features**

- Corneal transplant surgeons from different parts of the world have contributed numerous innovations to make this technique safe, reproducible, and successful in eliminating complications.
- This book describes the evolution of DSAEK, indications, preoperative evaluation, the instruments used, and the various methods of graft insertion.
- This book will help beginners as well as the endothelial keratoplasty surgeons.

---

<td>$2995</td>
</tr>
</tbody>
</table>

**2nd Edition**

**Key Features**

- Present a comprehensive review of phakic IOLs for the practicing ophthalmologists and refractive surgeons.
- Our primary goal is to provide the reader with well-referenced and up-to-date information on the latest developments in phakic IOLs.
- Attempt has been made to provide practical information and clinical pearls. This information facilitates surgeons’ day-to-day practice with phakic IOL implantation.
Ophthalmology & Optometry

**Ocular Therapeutics**

Ashok Garg

**Key Features**

- A comprehensive ophthalmic drug resource that provides most of the information on the fast-changing science of ocular drugs.
- Complete exhaustive coverage of all groups of ophthalmic drugs used worldwide in different clinical conditions of the eye.
- Well-illustrated with colour figures, tables, flow charts and chemical formulas to make it more reader friendly.

**Recent Advances in Ophthalmology**

Volume - 11

HV Nema & Nitin Nema

**Key Features**

- Presents recent advances in the diagnosis and management of glaucoma, macular hole, and retinal vascular occlusion.
- Contains 21 selected chapters and 3 editorials.
- Recent advances on macular dystrophies, ROH, HIV, JAM choroid, CSCR, IAT, etc. have been discussed in this book.
- Useful resource for postgraduate students in Ophthalmology and general ophthalmic practitioners.

**Retinoblastoma**

Aparna Ramasubramanian & Carol L. Shields

**Key Features**

- This is a comprehensive book covering retinoblastoma from the historical perspectives through methods of treatment, genetic counseling, differential diagnosis, prenatal testing, and future trends.
- There are over 340 illustrations, of which more than 320 are in colour.
- Valuable for those dealing with pediatric eye disorders.

**Ophthalmology Review**

Myron Yanoff

**Key Features**

- The second edition of ‘Ophthalmology Review’ contains a series of questions covering all ophthalmic subspecialties and the answers section has been greatly expanded to provide answers and explanations.
- The text has now been comprised of sprinkled images and illustrations, both in the question and In the answer sections.
- Valuable for practicing ophthalmologists and optometrists, students, residents and practitioners.

**Femtolaser Cataract Surgery**

Federica Gualdi & Luca Gualdi

**Key Features**

- This textbook is addressed to all surgeons, phacoemulsification experts and young ophthalmologists.
- The purpose of this textbook is to describe the femtosecond laser surgery for cataract.
- Explain the treatment and underline the benefits of this type of digital computerized surgery.
- The authors have shared their personal experience, giving advice for a successful surgery.

**Ocular Therapeutics**

Ashok Garg

**Key Features**

- Full Colour | Soft Cover | 3/e, 2013
- 4.25” x 9.25” | 1094 pp | 9789350900209
- ₹ 1550

**Ophthalmology Review**

Myron Yanoff

**Key Features**

- Full Colour | Soft Cover | 2/e, 2012
- 6.25” x 9.5” | 326 pp | 9789350255766
- ₹ 875

**Femtolaser Cataract Surgery**

Federica Gualdi & Luca Gualdi

**Key Features**

- Full Colour | Hardbound | 1/e, 2014
- 8.5” x 11” | 206 pp | 9789350909988
- ₹ 4500

**Recent Advances in Ophthalmology**

Volume - 11

HV Nema & Nitin Nema

- 6.25” x 9.5” | 420 pp | 9789350903430
- ₹ 875

**Retinoblastoma**

Aparna Ramasubramanian & Carol L. Shields

**Key Features**

- Full Colour | Hardbound | 1/e, 2012
- 8.5” x 11” | 318 pp | 9789350257845
- ₹ 3500
Jaypee’s Video Atlases

- Comprehensive video atlases comprise of exclusive videos of ophthalmic surgeries contributed by team of expert ophthalmic surgeons from across the world.
- High quality videos demonstrate step by step.
- The new technologies, especially Femtosecond Laser Refractive and Cataract Surgery, Minimally Invasive Surgery 23G and 25 G, Posterior Segment Surgery, modern vitreoretinal surgery, vitreous haemorrhage, ocular trauma, etc.
- Video atlases serve as a landmark reference not only for teaching residents in ophthalmic surgery practices, but also to experienced surgeons.

About Medquiz

An e-learning platform by Jaypee exclusively for health science students. It is an initiative for aspiring medicos to practice and evaluate their knowledge and skills under the guidance of subject experts. This continuous evaluation program helps novices to transform themselves into expert health science professionals.

There are two types of tests available on the portal, i.e. Grand Quiz and Demo Quiz. Grand Quiz opens occasionally for which cash prizes and certificates will be awarded to the winners whereas Demo quiz will remain open throughout the year for students to practice anytime once they get registered with us.

For more updates, please visit: http://medquiz.jaypeeapps.com

Each Chapter Features:

- Important topics
- Quality content
- High resolution images
- Schematic diagrams
- Recent advances
- Case studies
- Self-assessment exercises
- References
- Contribution from subject experts
- Look and feel of the book

Free Online Access to Best Chapters of Jaypee’s Latest & Standard Medical Textbooks for Undergraduates and Postgraduates
