Key Features
- Provides a comprehensive overview of General Surgery from Core Principles to specialisation in areas such as Pediatric, Cardiothoracic and Gastrointestinal Surgery.
- Features expanded content on Principles of Surgery, Trauma, Endocrine and Vascular Surgery.
- Expands the text on Gastrointestinal Surgery with subsections on Esophageal, Hepatopancreatobiliary, and Colorectal Surgery, in addition to Gastrointestinal Emergencies.
- Includes more contributors from international experts than any other surgical textbook available.
- Incorporates important advances in surgical practice such as the expansion of minimally invasive techniques.

Key Features
- Basic principle of dissection and technique of suturing is dealt with in detail.
- In detail surgical anatomy in each chapter which is essential pillar of the surgical technique.
- Plentiful photographs and illustrations nearly more than 8,000 of them will make the subject easily understandable.
- All procedures are dealt with step by step with reasoning, precautions and difficulties at different places of technique.
- Its unique presentations, detailed techniques, and plenty of photographs make this book differ from other operative surgery books.

Key Features
- Highly illustrated surgical manual.
- Includes informative description of all surgical diseases.
- Enriched with more than 1000 schematic diagrams to understand pathophysiology, pathology, clinical presentations and treatment.
- High quality photographs and imaging to get ideas about the disease itself.
- Quotations from renowned personalities are added in each chapter to make the reading experience more inspirational.

Key Features
- Latest and highly illustrated comprehensive guide.
- This authoritative textbook covers surgical procedures for a broad range of endocrine conditions.
- Provides up to date information on ontology, embryology, anatomy, clinical manifestations, diagnostic and localisation procedures, surgical and other treatment modalities for endocrine disorders.
- Enhanced by 550 full colour images and illustrations, an invaluable resource for surgeons and endocrinologists.
**SRB’s Manual of Surgery**

*Sriram Bhat M*

- 5th Edition
- Full Colour | Soft Cover | 5/e, 2016
- 8.5” x 11” | 1276 pp | 9789351524168

**Key Features**
- Updated and upgraded with a lot of dedication by the author.
- Important subjects are kept in font size 10pt; other subjects are in 9pt; and notes, remember, boxes and tables are in 8.5pt.
- Enriched with excellent quality of self-explanatory clinical photographs.
- The clinching physical signs have been highlighted in boxes with different colour shades.
- Surgical anatomy has been included wherever essential.

**SRB’s Manual of Surgery**

*Sriram Bhat M*

- 5th Edition
- Full Colour | Soft Cover | 5/e, 2016
- 8.5” x 11” | 1276 pp | 9789351524168

**Bedside Clinics in Surgery**

*Makhan Lal Saha*

- 3rd Edition
- Full Colour | Soft Cover | 3/e, 2018
- 6.5” x 9.5” | 1115 pp (T) | Forthcoming

**Key Features**
- Important long case discussion & a Diabetic foot added.
- Questions faced in ward rounds for PGs are added in surgical problems section.
- TNM classification for malignant tumor updated as per latest AJCC guidelines.
- Recent NCC guidelines incorporated to treat cancer.
- Along with new colour photograph, some CT and USG will be added for PGs.

**Textbook of Surgical Gastroenterology**

*PK Mishra*

- Full Colour | Hardbound | 1/e, 2016
- 6.5” x 9.75” | 1448 pp | 9789351529989

**Key Features**
- A highly illustrated two volume resource for residents and practising surgeons.
- Covers a vast range of gastroenterological conditions and their surgical management from basics to advance.
- Each section begins with a chapter on anatomy, before covering the surgical treatment of various disorders.
- Enhanced by 1200 images, and includes two DVDs with guidance on seven surgical procedures.

**Clinical Surgical Case Manual**

*A Comprehensive Treatise for Students, Teachers and Practitioners*

*Kanchana Sundaramurthy*

- 2nd Edition
- Full Colour | Soft Cover | 2/e, 2016
- 8.5” x 11” | 832 pp | 9789351525226

**Key Features**
- Organised by disorder type, with 92 chapters presenting various surgical cases, their presentation and management options.
- Fully revised and updated, with two new chapters on ‘Perforation of Hollow Viscus’ and ‘General Oncology for Surgeons’.
- Frequently asked questions are included at the end of some chapters.
- 151 illustrations and images enhance readers’ understanding of each condition.

**Laparoscopic Hernia Repair**

*How to Learn at Ease*

*R Padmakumar, et al.*

- New
- Full Colour | Hardbound | 1/e, 2017
- 6.5” x 9.75” | 154 pp | 9789386150677

**Key Features**
- Aims to make the procedure easy and learnable to young practicing surgeons.
- Each procedure is illustrated with a series of high-quality photographs in a step-by-step manner, allowing the reader to follow the sequence of the operation.
- The recognition and management of complications are highlighted and postoperative management is also described.
- Background information about hernia is detailed.
- Includes pediatric hernia repair and two-port repair.

**Laparoscopic Hernia Repair**

*RK Mishra*

- Full Colour | Hardbound | 1/e, 2013
- 8.5” x 11” | 262 pp | 9789350258729

**Key Features**
- Useful for general surgery residents, fellows and practicing surgeons.
- It provides information that will be extremely useful in the performance of routine and advanced hernia surgery, as well as when particular situations and difficult moments encounter during minimal access surgical repair of hernia.
- It is extensively illustrated with line diagrams and high-resolution photographs which are self-explanatory.
- Enhances the understanding of various techniques of hernia repair.
Surgery

CATALOGUE 2017-18

Atlas of Operative Surgical Oncology
Tata Memorial Centre
Sabita Jiwnani, et al.

Key Features
- This atlas presents surgical principles involved in the management of solid organs emphasizing on appropriate case selection and safe surgical techniques.
- A brief description of the postoperative evaluation of the patient for the procedure, types of anesthesia commonly employed and the positioning of the patient is also included.
- Operative photographs, illustrations and tables are the highlights of this atlas.

Full Colour | Hardbound | 1/e, 2017
8.5" × 11" | 268 pp | 9789386261984

₹ 2595

Principles & Interpretation of Laboratory Practices in Surgical Pathology
Shameem Shariff & Amrit Kaur Kaler

Key Features
- User-friendly manual on laboratory procedures.
- Covers routine and special staining procedures used in histopathology, anatomy and microbiology laboratories.
- A whole chapter dedicated to microtomy.
- Deals with cytopathology in detail.
- Provides recent advances in methodology, molecular techniques, byewaste disposal and safety measures.
- Outlines quality control in laboratories, audit and quality assurance programs.

Single Colour | Soft Cover | 1/e, 2016
6.25" × 9.5" | 340 pp | 9789352500246

₹ 595

Art of Laparoscopic Surgery
Textbook and Atlas
C. Palanivelu

Key Features
- This is the most updated text on the techniques of laparoscopic surgery with more than 1500 illustrations and photographs showing every known aspect of this field.
- It facilitates the readers to minimise their learning curve for application of laparoscopic procedures.
- It is expertly illustrated showing all the procedures performed laparoscopically.
- It serves as a practical, up-to-date guide on surgical laparoscopy for the benefit of surgical fraternity.

2 Volume Set

Full Colour | Hardbound | 1/e, 2005
8.75" × 11.25" | 1336 pp | 9788180619953

₹ 9350

General Surgical Operations
Dhiraj Choudhury

Key Features
- Includes a wide range of procedures, which are essential in modern surgical practices.
- Both conventional and laparoscopic procedures have been given due weightage.
- Many new chapters have been added such as Surgery for Liver, Surgery for Portal Hypertension, Principles of Bypass Surgery, Management of Bariatric Surgery, Management of Renal Cancer, Surgery of Adrenals, Parathyroidectomy, and Bariatric Surgery.

2nd Edition

Full Colour | Soft Cover | 2/e, 2017
8.5" × 11" | 460 pp | 9789351525202

₹ 2495

Textbook of Practical Laparoscopic Surgery
RK Mishra

Key Features
- Provides perfect understanding of the laparoscopic surgery to the practising surgeons and gynaecologists.
- Provides information that will be extremely useful in the performance of routine and advanced hernia surgery, as well as when particular situations and difficult moments encounter during minimal access surgical procedures in day-to-day clinical practice.

3rd Edition

Full Colour | Hardbound | 3/e, 2013
8.5" × 11" | 620 pp | 9789350259412

₹ 4950

Art of Abdominal Contouring
Advanced Liposuction
Sanjay Parashar

Key Features
- A concise, richly illustrated collection of abdomen contouring procedures.
- Covers non-invasive and comprehensive weight reduction methods for patients with medical conditions which make them unsuitable for invasive procedures.
- Art of Abdominal Contouring is enhanced by 240 full colour images and illustrations.
- Includes an interactive DVD with eight instructional videos.

223 Contributors

Full Colour | Hardbound | 1/e, 2016
8.5" × 11" | 175 pp | 9789352500239

₹ 7695
Atlas of Endocrine Surgical Techniques
Sally E Carty

Key Features
- Bulleted points allow the reader to gather information at a glance.
- Sections devoted to indications, evidence, preoperative assessments, surgical planning, instruments needed, surgical techniques, follow-up, and complications.
- Illustrated surgical techniques with anatomical drawings and photographs.
- Expert feedback by the authors in the Pearls and Pitfalls section.
- A wealth of anatomic illustrations along with abundant intraoperative photographs and imaging studies.

Clinical Surgery
A Text and Atlas
Sunil Chumber

Key Features
- A complete textbook both for the curious students who have started learning the basics of clinical evaluation as well as a complete guide for the senior surgeons teaching clinical methods to the students.
- Includes 38 chapters in specific areas pertaining to surgery as well as allied specialties.
- Amply illustrated with color photographs, x-rays, diagrams and charts.

Basic Surgical Skills and Techniques
Sudhir Kumar Jain, et al.

Key Features
- Focuses on the basic art of surgery.
- Reflects not only the success of basic surgical skills and techniques but brings also the latest advances in surgery to the reader.
- Embraces the basic principles of surgery and explains the details in a lucid manner.
- The book comes from authors who have been awarded globally for their academic excellence.
- Illustrates with lucid diagrams and studded with many surgical pearls.

Techniques of Liver Surgery
Vinay Kumaran

Key Features
- Written by experienced surgeons to guide the aspiring surgeons through all the important aspects of liver surgery, its indications, techniques, etc.
- Patient selection is discussed along with techniques.
- Includes operative photographs and illustrations to clarify steps of surgery.
- Description of the "W Technique", a safe and easy technique for performing the hepatic artery anastomosis in living donor liver transplantation.

Contemporary Management of the Diabetic Foot
Sharad Pendsey

Atlas of Liposuction
Adrien E Aiache & Melvin A Shiffman

Yearbook of Vascular and Endovascular Surgery 2016
R Sekhar

Surgeon’s Knife Head & Neck Incisions
Mohammad Akheel & Ashmi Wadhwania

A Practical Approach to Robotic Surgery
Ajit Saxena

Art and Science of Cleft Lip and Cleft Palate Repair
Girish N Amlani

Key Features
- Provides comprehensive information on complete care of diabetic foot.
- Includes surgical anatomy, biomechanics, neuropathy, peripheral arterial disease, infected foot, amputations, Charcot foot, off-loading, foot wear, education and prevention of diabetic foot.
- Enriched with more than 300 images, over 50 tables and suggested reading.
- Useful for physicians, surgeons, podiatrists involved in the management of diabetic foot.

Key Features
- Presents an exhaustive survey of the current techniques in suction lipectomy.
- Covers basic theory, preoperative procedures and general techniques.
- Discusses the use of the liposuction on each specific area of the body.
- Many colour photographs and illustrations showing actual clinical cases.
- Useful aid for lipoplastic surgeons, well-trained operators, and plastic surgery practitioners.

Key Features
- An outstanding compendium on the subject.
- Presents a summary of all facial and skull incisions from the oldest to the most current ones.
- Provides surgical approaches for congenital conditions, trauma and tumor surgery as well as reconstructive surgery.
- Covers all incisions of head and neck region.
- Useful for students and trainers of maxillofacial surgery, dental surgery, otolaryngology, general surgery, head and neck surgery, and plastic surgery.

Key Features
- The chapter on Ergonomics is especially designed to assist the hospitals which are desirous of establishing robotic surgery from square one.
- Encompasses the major specialties using the robot from cardiac surgery to urology.

Key Features
- A brief and simple text on the subject.
- Presents useful description on embryology and anatomy related to cleft lip and cleft palate.
- Includes excellent illustrations of cleft lip and palate.
- Discusses various surgical procedures and operative steps of cleft lip and cleft palate surgeries through clinical photographs.
Urgent Procedures in Medical Practice
Sanja Kupesic Plavsic

This comprehensive video atlas contains high-yield information on core procedures in family medicine, internal medicine, emergency medicine, surgery and gynecology.

DVD presents 50 procedural skills demonstrated on partial task trainers, full body simulators, cadavers and/or real patients in real clinical scenarios.

Chapters featuring procedural skills provide a concise review of the procedures and include 5 multiple choice questions and answers to test the learner’s knowledge.

Key Features

- An innovative series for students that fully integrates core science, clinical medicine and surgery.
- Engaging clinical cases show how skilled clinicians work through a presentation.
- Graphic narratives bring clinical cases to life.
- Starter questions – stimulating answers to intriguing questions make learning fun.
- Boxes highlight tips, tricks and key learning points.

ACS (I) Textbook of Cutaneous & Aesthetic Surgery
Association of Cutaneous Surgeons (I)
Mysore Venkataram

166 Contributors

2nd Edition

New

Key Features

- 59 new chapters added covering new topics such as body-shaping, microsurgery, new laser and energy technologies, platelet-rich plasma, aesthetic techniques, social media, marketing, and training in dermato-surgery and many more.
- New section added on regional surgeries.
- Enriched with almost 2000 colored images and illustrations.
- Text boxes, tables, keynotes, and pearls are included in all chapters.
Surgery

Roshan Lal Gupta's
Recent Advances in Surgery (Vol. 14)
Puneet

Key Features
- The book provides latest knowledge of imaging, evaluation and management of the surgical problems.
- Focused for young practicing surgeons and postgraduate students.
- Covers important topics for various examinations and surgical practice.
- Contribution from eminent surgeons with vast experience in teaching and training.
- Includes relevant flowcharts, tables, and photographs for better understanding.

Roshan Lal Gupta's
Recent Advances in Surgery (Vol. 13)
Puneet

Key Features
- New volume brings clinicians up to date with recent advances in surgery.
- Each chapter discusses a surgical subspecialty, disorders and the various techniques for their management.
- Presented in easy to understand format.
- Includes nearly 150 images, illustrations and tables.

Thyroidectomy
Anatomical Basis of Surgical Technique
Ernesto P Molmenti, et al.

Key Features
- A practical book destined to surgeons at the initial stages of their experiences.
- Highlights the fundamental relevance of surgical anatomy.
- The text addresses the images and illustrations derived from the experience of the authors, as registered by means of surgeries, anatomical dissections, and schematic representations.

Exam Preparatory Manual for Undergraduates
Surgery
Gunjan S Desai & Ronak Patel

Key Features
- Written in question-answer format.
- Contains over 450 questions asked in various university examinations along with their answers.
- Written in simple language and lucid style.
- Helpful for last minute revision before examination.
- Compilation of all university examination questions and answers from authentic references.
- Discussion of all malignancies for rapid revision.

Undergraduate Surgery Simplified
A Directed Self-learning Course for Undergraduate Surgical Students
Peter Lee

Key Features
- A problem-based self-learning course covering the essentials of the clinical-surgical undergraduate curriculum.
- Presents in three progressive case-based modules and comprehensively illustrated with nearly 300 clinical pictures, X-rays, scans and drawings.
- Based on the Directed Self-Learning Course developed over several years at Penang Medical College, Malaysia (affiliated to the Royal College of Surgeons in Ireland and University College, Dublin).
Atlas of Thyroid Disorders & Thyroid Surgery
Amit Agarwal

- Covers the whole spectrum of surgical thyroid diseases.
- Contains beautiful and clear clinical, intraoperative, microscopic and imaging illustrations.
- Includes rare cases of surgical thyroid disorders.
- Illustrates step-by-step surgical anatomy and techniques of thyroidectomy.

Basic Laparoscopy and Instrumentation
Sadasiv Patil

- Written in a simple and easy-to-understand language.
- A must-read for all the beginners in laparoscopic surgery.
- Deals with basics in laparoscopic surgery.
- Laparoscopic instruments dealt in a separate chapter.
- High resolution self-explanatory photographs of various techniques have been included.

Atlas of Vascular and Endovascular Surgical Techniques
M Ashraf Mansour, et al.

- This book describes a practical approaches of the commonly performed vascular procedures, both open and endovascular.
- Highly illustrated atlas include bulleted, template format with sections on Evidence, Materials Needed, Patient Positioning, Risk Assessment, Complications, Outcomes, and Follow-up.
- Includes interesting Quiz at the end of chapters.
- Most chapters include pearls and pitfalls for easy recall.

Kidney & Pancreas Transplantation
Molmenti

- The most comprehensive illustrated book published on the topic of Kidney and Pancreas Transplantation.
- Examines the entire gamut for transplantation, including evaluation, surgical techniques, and complications.
- Offers an extensive coverage of living and deceased donor kidney considerations.
- Divided into 22 sections including 74 chapters.
- Step-by-step surgical procedures and key concepts.

Differential Diagnosis in Surgery
Mahmoud Sakr

- Diagnostic procedures have been perceived by explaining history taking, physical examination, and appropriate investigations.
- Bibliography is also provided for further reading.
Atlas of Laparoscopic & Robotic Urologic Oncological Surgery
Reza Ghavamian

This atlas provides a compilation of chapters, each written by world-renowned experts in the field of minimally invasive urologic surgery. It is a valuable adjunct for surgeons embarking on Laparoscopic and robotic urologic oncological surgery. This atlas will provide the surgeons in training, namely residents in urology and fellows in laparoscopic and robotic urologic surgery a quick and easy-to-use reference for minimally invasive urologic oncological surgery.

Key Features
- Made easy practical examination book.
- Every short case is described with Clinical Diagnosis and Viva Voice questions with their answers and Discussion of the disease at the end.
- Excellent format of Discussion explains clinical features, pathology, investigations, prognosis, complications and treatment of the disease.
- New chapter on non-clinical practical examination.
- Covers viva on 95 short cases of surgical diseases.

Long Cases in General Surgery
R Rajamahendran

A highly illustrated surgical guide outlining the latest advances in the management of vascular diseases. Chapters on imaging for vascular disorders include non-invasive vascular imaging, catheter-based angiography, magnetic resonance angiography, and computed tomographic angiography. Discussion on the latest techniques including recent endovascular practices, their indications and results. With over 350 full colour illustrations and images.

Key Features
- Discusses all types of Hernies.
- Includes information on latest trends and practices in hernia surgery.
- Elaborates tips to surgeons for doing effective recurrence free surgery of hernia.
- Compiles short but informative history of hernia surgery.
- Emphasises on methods of hernia surgery with open and laparoscopic approaches with latest information.

Hernia Surgery Simplified
Sachin Kuber

Discusses all types of Hernies.
Includes information on latest trends and practices in hernia surgery.
Elaborates tips to surgeons for doing effective recurrence free surgery of hernia.
Compiles short but informative history of hernia surgery.
Emphasises on methods of hernia surgery with open and laparoscopic approaches with latest information.
Clinical Surgery Made Easy
R Thirunavukarasu

Key Features
- Synopses of all common topics to help students for quick revision.
- Includes essential surgical anatomy, terms, concepts, and surgical cases.
- Provides a comprehensive study on various clinical surgical conditions.
- Useful for undergraduate and postgraduate students of surgery.

Evidence-Based Practices in Gastrointestinal & Hepatobiliary Surgery
Govind Nandakumar

Key Features
- The book provides a practical, concise and evidence-based approach to the surgical care of the complex gastrointestinal and hepatobiliary patient.
- The practical approach of the book will make it a good adjunct to textbooks that address the pathophysiology and basic science of disease processes.
- Evidence-based approach and Landmark Trials gives the necessary background information to readers for constant review and updation of the ever changing literature.

Clinical Surgery
Mahmoud Sakr

Key Features
- This book aims to help the medical student or clinician to meet the many challenges that they face in the clinical setting today.
- Useful to surgeons to reach diagnosis using history taking, physical examination, appropriate investigations, differential diagnosis, etc.
- Enriched with clinical photographs, tables, flowcharts and diagnostic imaging for better visual understanding.
- Bibliography is also provided for further reading.

The Diabetic Foot
Robert Hinchliffe, et al.

Handbook of Focal Therapy for Prostate and Renal Cancer
Truls Bjerkland Johansen, et al.

Cosmetic Surgery After Massive Weight Loss
Seth R Thaller & Mimis Cohen

Comprehensive Textbook of Surgery
Dinesh Vyas

Rejuvenation of the Aging Body
Surgical and Nonsurgical Treatments
Neil Sadick, et al.

Management of the Difficult Airway
A Handbook for Surgeons
Jerome Thompson, et al.

Rejuvenation of the Aging Face
Amir M Karam & Michel P Goldmen

Key Features
- Written in a practical, clinically-oriented style
- A comprehensive, timely review of targeted ablation methods to treat prostate and renal cancers.
- It describes the most effective techniques in current practice, with discussion of the selection criteria, ablation technologies and their limitations, and advice on the management of common side effects.

Key Features
- Provides a definitive 'go to' reference for trainees and practicing plastic surgeons.
- Covers all aspects of the management of post-bariatric patients, from the options for weight loss surgery to the psychological needs of the patient.
- Gives practical advice on the approach to the patient, the formulation of individual treatment plans, and the avoidance of clinical complications.

Key Features
- A group of six distinguished and accomplished editors with more than thirty contributors have made their contribution in the making of this book.
- The book has been written keeping in mind the disconnection between the currently available surgery textbooks and the resources available in most of the hospitals in the world.
- The target audience is medical students, nursing students, surgery residents and surgeons.
Books on Recent Advances in Surgery

by

Irving Taylor
Colin D Johnson
Michael Douek

Salient Features

- This book reviews surgery in general and major sub-specialities of general surgery.
- Includes sections on surgery in general, upper gastrointestinal, lower gastrointestinal, breast surgery, vascular surgery, surgical oncology and section on the recent randomised trials in surgery.
- Excellent revision material for professional examinations and consultant surgeons who wish to keep up-to-date.
- Reviews current topics in surgery-in-general and in the major subspecialties of general surgery.
- Includes chapters on perioperative care, breast reconstruction, facial paralysis, diabetic foot, etc.
- Excellent revision material for professional examinations, and will help consultant general surgeons keep up-to-date across the specialty.
Jaypee’s Video Atlases

**Salient Features**

- Provides better understanding of endoscopic anatomy, procedural details, and technical planning required in Robotic Surgery.
- Audio-video procedural videos shall empower the beginners as well as established minimal access surgeons, colorectal surgeons, etc.
- Step-by-step instructional videos for various procedures using robotic system.
- Procedures have been performed by a team of surgeons from Galaxy of experts.
- Explains various types of surgeries like Robotic Transthoracic Esophagectomy, Radical Nephrectomy, Hysterectomy, Radical Hysterectomy, Low Anterior Resection and Anterior Exenteration, etc.
Surgery

CATALOGUE 2017-18

Salient Features

- Extensive evidence-based references to relate theory to clinical practice.
- Comprehensive coverage of scenario-based questions, model answer enhanced with concise revision notes and practice question for exam success.
- Case-based description to consolidate knowledge.
- Highly illustrated with diagrams, tables, key concepts, clinical photographs, line drawings and algorithms.
- Includes practical advice on how to approach the exam and useful tips to achieve the highest marks.
- Useful for trainees preparing for Membership of the Royal College of Surgeons (MRCS) and fellowship of the Royal College of Surgeons (FRCS).

About Medquiz

An e-learning platform by Jaypee exclusively for health science students. It is an initiative for aspiring medicos to practice and evaluate their knowledge and skills under the guidance of subject experts. This continuous evaluation program helps novices to transform themselves into expert health science professionals.

There are two types of tests available on the portal, i.e. Grand Quiz and Demo Quiz. Grand Quiz opens occasionally for which cash prizes and certificates will be awarded to the winners whereas Demo quiz will remain open throughout the year for students to practice anytime once they get registered with us.

For more updates, please visit: http://medquiz.jaypeeapps.com
